Office Action Summary	Examiner	Art Unit			
The MAILING DATE of this communication and	Saúl J. Rodríguez	3681			
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply					
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).					
Status					
1) ⊠ Responsive to communication(s) filed on 21 June 2005.  2a) ⊠ This action is FINAL. 2b) ☐ This action is non-final.  3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under Ex parte Quayle, 1935 C.D. 11, 453 O.G. 213.					
Disposition of Claims

U.S. Patent and Trademark Office PTOL-326 (Rev. 1-04) 4

#### **DETAILED ACTION**

The following Office Action is responsive to the amendment filed June 21, 2005.

### **Priority**

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

# Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

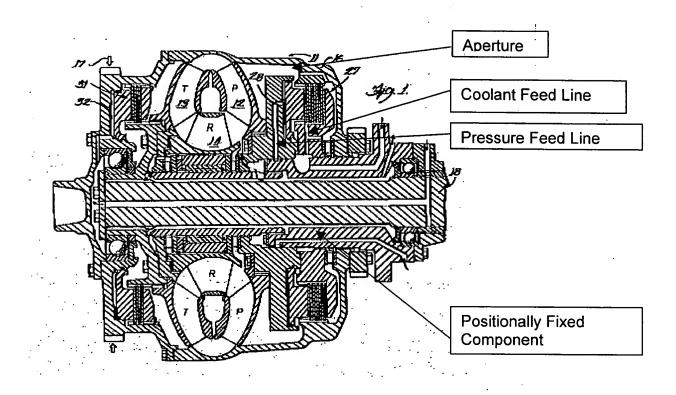

Claims 9-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allen et al. ('417) in view of Suzuki ('638).

Allen et al. discloses a hydrodynamic torque converter (Fig. 1) comprising a clutch (27), a drive/housing (16), a pump impeller wheel (12), a turbine rotor (13), a controllable actuation device (28), an aperture (Fig. 1), a positionally fixed component

Application/Control Number: 10/773,657

Art Unit: 3681

(Fig. 1) with a rotary connection, a pressure feed line (Fig. 1), and a coolant feed line (Fig. 1). Allen et al. does not show a pressure sensor.

However, the practice of using sensors for controlling torque converter clutches and/or clutches in general is very common in the art. For example, Suzuki discloses a torque converter (Fig. 1) comprising a stationary internal pressure sensor (Col. 9, lines 14-26), a pressure lines (15, 16), a tapping point, and a control unit (31). Then, it would have been obvious to a person of ordinary skill in the art at the time the invention was made to provide a pressure sensor in the device of Allen et al. in view of Suzuki to monitor the operating conditions within the torque converter.

# Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Concerning applicant's arguments regarding the lack of suggestion to combine in the reference themselves, given the same field of endeavor and the similar need to control the engagement of a friction member in a hydrodynamic torque converter, would have led a person of ordinary skill in the art to combine their teachings as proposed in the Office Action.

Responding to applicant's argument regarding the pressure arrangement, noting the lack of disclosure about the fluid circuit of the instant application, the alleged distinctions between the prior art and other compatibility issues could not be relied upon for the purpose of novelty. For the purposes of rejection, Allen merely teaches the general structure of the locking hydrodynamic assembly and Suzuki shows the conventional nature of sensors directly connected to the inner space of the converter.

#### Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3681

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Saúl J. Rodríguez whose telephone number is (571) 272-7097. The examiner can normally be reached on M-F 9:30-6:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Charles A. Marmor can be reached on (571) 272-7095. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
